

## Hebron Driveway Plowing Guidelines

- The Town of Hebron will plow residents driveways that opt in to the program and pre - pay for the season. The Highway Supervisor has the right to deny any driveway due to extreme circumstances or hazardous conditions.
- Features near or in the driveway should be marked with 4' stakes indicating the hazard, i.e. stone walls, well heads, septic systems or any other non moveable objects.
- Neither the town or it's sub-contractors are responsible for damages to features incurred during plowing.
- The town will plow driveways only if snow depths reach 3" or more, measured at the highway garage.
- The town will only plow if the ground is frozen.
- The town is not responsible for sanding or salting driveways, plowing of drifted snow or plowing out mailboxes.
- Owners shall be responsible for widening driveways in the event that snow accumulation has narrowed it to a point where plow drivers can no longer remove snow effectively
- All attempts will be made to clear out driveways as close to garage doors as possible. Some hand shoveling by the owners will still be needed.
- As always town roads are a priority. Driveways will be plowed as soon as possible once the roads are passable.
- **Safety first!** Please keep children and pets out of harms way and away from the driveway while plowing occurs.
- Any owner wanting their driveway plowed mid way through the season that hasn't been plowed previously will be required to have any accumulated snow removed first.
- Plow payments must be received by Nov 1. No plowing will occur until payment is received.
